

Training Management Solution (Greytrix Business Manager in Practice)

Greytrix presents a powerful, intuitive Training Management Solution that can help Training Companies streamline the registration process and the coordination of courses.

It provides the ability to create courses and modules, to communicate course information to interested parties, to manage clients' expressions of interest and provide booking confirmations, to prevent over booking of courses, and to manage course related pricing, including promotional discounts.

Registration Process

This solution enables a Web User to browse courses based on defined criteria such as: category, location or date, find a course they're interested in and make an online booking. Since the solution is completely integrated into Sage CRM, the booking details are forwarded directly into CRM.

 Notes:

Training Programme Management

In addition, this Training Management Solution enables the Programme Coordinator to manage key resources and schedules with ease. They can get an update on course registrations and potential revenue, at the touch of a button and manage course communications all from the one place.

The screenshot displays two overlapping windows from a CRM application. The top window shows an attendance list with columns for Person, Attendance Status, and Created Date. The bottom window is the 'Resource Planner' interface, showing a calendar view for Tuesday 26 January, 2010. It features columns for resources: Fred Jones, John Finch, Conference Room 1, Meeting Room 1, and Projector x300. Each resource column contains details such as users, phone numbers, and event information. On the right side of the Resource Planner, there are filters for 'Communications Filter' and 'Resource Filter'.

Resource Management - Screenshot

Apart from being able to see resources free and busy times, the Training Management Solution ensures that they cannot be double booked!

Students, trainers and programme coordinators can login and access relevant information anywhere, anytime, using laptops, smart phones or tablets.

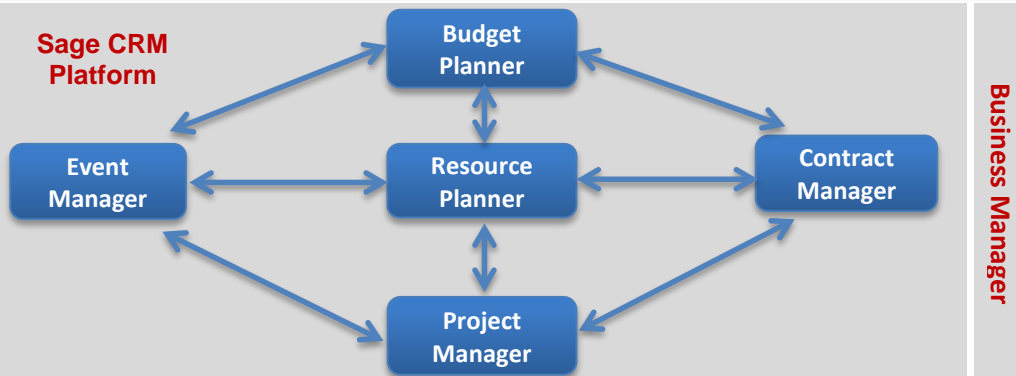

Supported by Greytrix CRM Event Manager and CRM Resource Planner products running in the Sage CRM environment, this is the perfect solution for all training management needs. It incorporates all the benefits of CRM including user interface design, searching, reporting and document management.
