

GUMU™ For Sage Intacct - Avalara Integration

Your trusted tax compliance partner!

The GUMU™ Sage Intacct and Avalara integration ensures quicker tax calculations, hassle-free returns filing & effortless handling of exemption certificates. Also, AvaTax for Sage Intacct enables real-time monitoring of tax regulations by creating a single tax profile tailored to the specific customer regardless of the mode of purchase and payment. Track changing modules of law, rates and rules and ensure appropriate compliance with the GUMU™ integration of Sage Intacct and Avalara.

Integration Touchpoints:

Sales Invoice:

All sales invoices generated in Sage Intacct are integrated into Avalara. The Tax amount on the sales invoice is estimated by Avalara that largely depends on its subtotal. Post this, the final invoice is integrated back into Sage Intacct.

Credit Memo:

All taxes and charges are calculated and added to Credit Memos in Avalara. The final amount of the Credit Memo is updated in Sage Intacct after tax is added to the subtotal in Avalara.

Why choose this **integration**?

01

Quick compliances

Automate tax calculation and eliminate any error due to manual calculations. The Sage Intacct-Avalara integration offers precise sales and usage tax calculations by verifying all the rates and rules in one go. This tax compliance is an ideal choice for rapidly growing businesses.

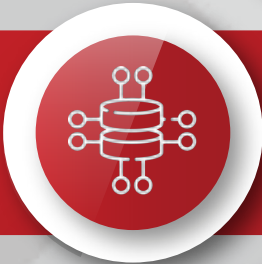

02

Simplified filing and remittance

Stay put with changes in law and rules, enable easy filing of returns and remittance calculation by automating your tax compliance processes with GUMU™ Sage Intacct-Avalara Integration.

03

Central Data Repository

It allows you to store all your tax compliance documents in one place, accessible at any time and from anywhere. Sage Intacct and Avalara integration helps ensure better compliance with all state and federal regulations creating an efficient working environment.

04

Automate Data Synchronization

The in-built program scheduler in GUMU™ Sage Intacct-Avalara Integration runs the automated schedules for modules like Sales Invoice and Credit Memo. It makes sure that each data synchronization is treated as a unique process/job, allowing you to schedule these processes at specific periods.

05

Supports Multi-Tenancy:

In Sage Intacct, multi-entities are viewed as independent firms for multi-entity taxation. As a result, save more time and enjoy error-free multi-entity tax.

Get the GUMU™ Integration of **Sage Intacct** and **Avalara** and enable easy tax compliances!
