

GUMU™

for

Sage Intacct

OANDA®

Integration

**Optimize Your Foreign Exchange Business as Per Industry Standards!**

Do you want to make your foreign exchange business operations quicker, smoother, and sleeker? Well, GUMU™ for Sage Intacct – Oanda integration helps you achieve just that! The integration facilitates automation of multiple currencies management along with quick conversions for transactions. For years, Oanda has been a leading service provider in the foreign exchange market and deals in multi-asset trading. Sage Intacct and Oanda are seamlessly integrated using the GUMU™ connector and, thus, help businesses and individuals leverage a unified solution that provides accurate real-time insights into the FX market.

**Integration Touchpoints****Exchange Rates**

One of the key features of the Oanda tool is that it provides good exchange rates. To solidify these rates as the default rates, they are integrated into the Sage Intacct Cloud ERP system

**Reports**

The integration allows organizations to present reports in either the local currency of each entity or the headquarters' currency.

# Why Choose This Integration?

## Accurate and Reliable FX Data

The integration between Sage Intacct and Oanda aims to deliver the best possible solution to users while allowing them to get automated access to accurate and reliable foreign exchange data directly from the Sage Intacct ERP system.

## Sleeker Consolidation Process

Without integration support, the consolidation process usually takes around 30-40 hours. Whereas the integration makes it as quick as a few seconds with Sage Intacct's multi-currency management and global financial consolidation features.

## Automated Conversions

The integration of Oanda with Sage Intacct using GUMU™ makes it easier for companies to not only get automated conversions for transactions, but also to manage the financials for multiple locations.

## Real-time Dashboard

The Sage Intacct and Oanda integration using GUMU™ ensures a prominent feature for businesses and individuals, which is the real-time dashboard. It provides all the insights related to the FX market as well as information on currency gains and losses.

## Multi-Currency Environment

Being a prominent ERP system, Sage Intacct supports the multi-currency or multi-entity environment. The integration allows businesses to leverage this feature to reduce their consolidation time.

## Seamless Integration

The one-click integration platform - GUMU™ makes it seamless and hassle-free to integrate Oanda into Sage Intacct as it requires no coding.

## About Greytrix

Greytrix is a leading service provider for Sage Development and Integration needs in the global market. With more than 22 years of experience, we are known to deliver cutting-edge ERP and CRM solutions to businesses worldwide. To streamline the process, we have GUMU™ as our native cloud connector, which helps us integrate ERP systems like Sage Intacct, Acumatica, Sage 100, and Sage X3 with CRM systems such as Salesforce, Dynamics 365 CRM, and Sage CRM. Not just this, our champion integrator also facilitates third-party app integrations with ERP like Avalara, Magento, MediusGo, Treez, Shopify, and more. Enable on-point accuracy and quick transactional time for your business with the GUMU™ Integration of Sage Intacct and Oanda today!
