

**GUMU™**  
for  
**Sage Intacct**  
  
**Rent Manager™**  
Integration

Cloud technology and allied solutions outweigh the benefits offered by the on-premises systems by building business applications that are always on, always available, easy to integrate & scalable. Rent Manager is an all-in-one cloud based software for companies that manage all type of properties. By integrating Rent Manager to accounting and financial management software like Sage Intacct, property management companies can meet their core financial requirements like quick reporting on financial and operational data. Using Sage Intacct Web Services; external applications can be easily integrated with Sage Intacct. It resolves challenges faced by property management companies by completely automating the recording of accounting transactions without the involvement of other resources. All applications use the same platform allowing real time data sharing and processing.

### Synchronize Vendors, Bills, Payments

Sync entities in Rent Manager from Sage Intacct. Vendors are setup & maintained in Sage Intacct and users can mark bills in Rent Manager as paid using the AP Bills payment details from Sage Intacct.

AP Bills are paid using desired payment method. Also, once paid the Bills are updated in Rent Manager as well. In addition to this, Void Payments from Sage Intacct will import into Rent Manager.

In case, a payment in Sage Intacct that already exist in Rent Manager gets void later, the status of the corresponding payment in Rent Manager changes to void payment.
