

Discover the
realm of
IoT
with
Greytrix

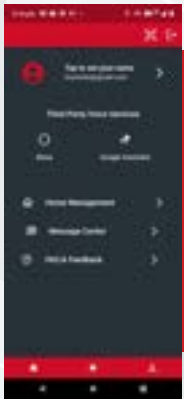

With the widespread adoption of digital technology; automated tools, smart devices, and streamlined workflows are empowering businesses to make informed decisions and handle challenges better. Smart devices transcend dimensions of time and space by helping one operate devices remotely through a simple and secured application.

With 23+ years of industry expertise in providing cutting-edge enterprise solutions, Greytrix is known for delivering out-of-the-box IT solutions that cater to niche functional needs. Leveraging on this robust skillset, We bring to you an extensive IoT solution to embrace the fast-paced digital life!

What's in the app?

Introducing our ingenious IoT solution that helps connect to smart devices at home and office. With intuitive device control and screen scheduling options customize experiences as you automate smart devices with pre-set commands in a few clicks.

Open doors to new-age living with our app

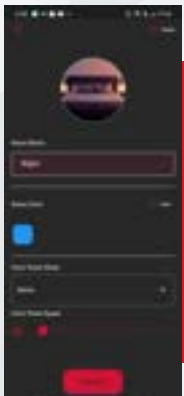

User Registration

The app requires the users to register with basic credentials and create a profile

Device Management

Add as many devices to the same app and have a single application for all your smart devices

Home creation

Create a home, link multiple rooms and mark devices for easy identification

Asset and User Management

Add devices and register users against each device to enable users to access assigned devices only

Scene handling

We have in-built scenes that help the smart device adjust to your pre-set mood and aid a better experience. Set working hours, adjust lights, modulate music, and customize the scene to best suit your needs.

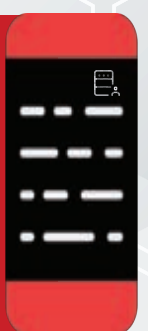

Scheduling

Automate the devices to work according to a time schedule and function automatically.

Device logs

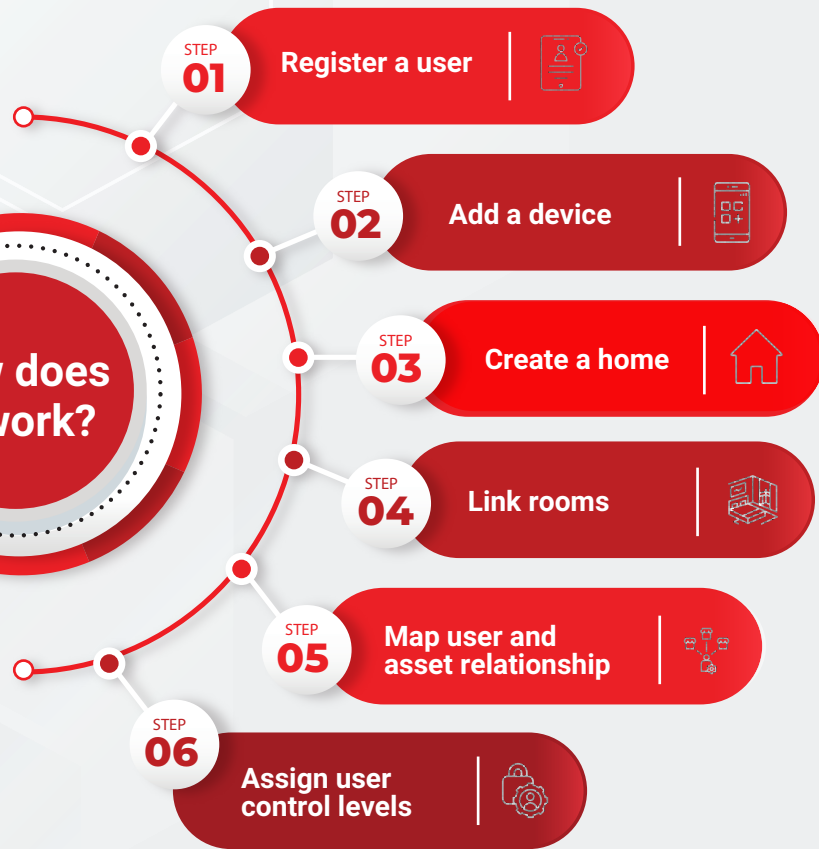

Access history of rules or commands set over a period of time

Admin access

To protect the interests of the users, one can register users against device to be able to control those devices. Admin provides access to users to control particular rooms and devices
