

Vendor Portal

Manage Purchase Processes and Vendors in one place with just a few clicks!

It's time to put your purchase operations on track with Supplier Portal. It's a partner app listed on BPortaly and serves as a solution for suppliers to operate and manage their purchase processes and inventory effectively.

Modules

Vendor/Supplier

Effectively manage suppliers with detailed insight into supplier data, including name, id, and history.

Purchase Quotes

Generate purchase quotes or link them effectively from ERP to Supplier Portal - also, sync quotes in real-time.

Purchase Orders

Ensure easy order synchronization through the Purchase Orders module. It supports easy linking of purchase orders from the Vendor Portal to ERP.

Purchase Invoices

Sync purchase invoices in real-time from ERP with all purchase order details quickly and accurately using the Purchase Invoices module.

Real-time Inventory

Supplier Portal updates you with the stock availability at a specific warehouse in the Inventory module.

Products

The Products module allows you to update existing products and add new ones through seamless product synchronization.

Key Benefits

Improved Purchase Efficiency

A comprehensive view of vendors' purchase history/movement, allows them to make informed decisions.

Multi-Company Support

Supplier Portal enables multi-company support. This means an organization can add more than one company/site and manage its purchase-related pursuits in different environments.

Secure Purchase Processing

Easily track changes in purchase history and ensure seamless and timely purchase processing.

Customized User Access

Vendor Portal gives the admin user a special feature to enable unique login access. This means a user role can be defined based on which the UI and features will vary.

Centralized Data

Ensure a centralized data view through data synchronization and seamless purchase operations with no manual errors.

Product Information

Use the product synchronization feature to get up-to-date information on every product, like availability, product ID, category, real-time inventory, and warehouse choices.

Purchase History

Supplier Portal gives a comprehensive view of the customer's purchase cycle and purchase history with all the purchase documents available in one place.
